The main reason for profit margin decrease is that most contracts for the products sold by the Group in 2004 were signed before the first half year of 2003, at that time, the contracts were secured at low prices and the price of raw material continued to grow and subcontracts were increased.

發展中物業之成本以截至目前所發生之成本減去可預見之損失列示。

建造合同

如果建造合同的結果能夠可靠地估計，應根據完工百分比法在資產負債表日確認合同成本。合同完工進度是根據累計實際發生的合同成本佔合同預計總成本的比例確定。

如果建造合同的結果不能夠可靠地估計，合同成本應在發生時確認為費用。

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investments in securities

Investments in securities are recognised on a trade-date basis and are initially measured at cost.

At subsequent reporting dates, debt securities that the Group intends to hold to maturity (held-to-maturity debt securities) are measured at amortised cost, less any impairment loss recognised to reflect irrecoverable amounts. The annual amortisation of any discount or premium arising on the acquisition of a held-to-maturity security is aggregated with other investment income receivable over the term of the instrument so that the revenue recognised in each period represents a constant yield on the investment.

Investment securities, which are securities held for an identified long-term strategic purpose, are measured at subsequent reporting dates at cost, as reduced by any impairment loss that is other than temporary.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the weighted average cost method.

Properties under development for sale are stated at development cost incurred to date less provision for foreseeable losses, if any.

Construction contracts

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the balance sheet date, as measured by the proportion that costs incurred to date bear to the estimated total costs for the contract.

When the outcome of a construction contract cannot be estimated reliably, contract costs are recognised as expenses in the period in which they are incurred.

4. 主要會計政策(續)

建造合同(續)

如果合同預計總成本將超過合同預計總收入,應將預計損失立即確認為當期費用。

如果一項建造合同包括多項資產,每項資產均有獨立的建造計劃和單獨的談判,且其收入和成本可單獨辯認,則每項資產應分立為單項合同處理。一組同時或依次履行的合同,如果是按一攬子交易簽訂,且每項合同實際上已構成一項綜合利潤率工程的組成部分,則這一組合同應合併為單項合同處理。

退休金

退休金及撥備乃根據當地政府之有關文件訂立之定額供款合約列入損益賬。

研究及開發費用

研究及開發費用於產生時列入損益賬。

僅當研究及開發費用的發生有一明確的項目,且通過將來的商業活動能夠收回時,研究及開發費用才能確認為內部產生的無形資產。因此而形成的資產在其使用期內按直線法攤銷。

如果研究及開發費用未能確認為內部產生的無形資產,則該支出在發生當期確認為費用。

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Construction contracts (continued)

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

When a contract covers a number of assets, the construction of each asset is treated as a separate contract when separate proposals have been submitted for each asset, each asset has been separately negotiated and the costs and revenues of each asset can be separately identified. A group of contracts, performed concurrently or in a continuous sequence, is treated as a single construction contract when they were negotiated as a single package and are so closely inter-related that they constitute a single project with an overall profit margin.

Retirement benefit costs

Retirement benefit costs charged to the income statement represent the amount payable under a defined contribution arrangement with the local government.

Research and development expenditure

Expenditure on research and development is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development expenditure is recognised only if it is anticipated that the development costs incurred on a clearly-defined project will be recovered through future commercial activity. The resultant asset is amortised on a straight-line basis over its useful life.

Where no internally-generated intangible asset can be recognised, development expenditure is recognised as an expense in the period in which it is incurred.

4. 主要會計政策(續)

所得稅

所得稅支出代表當期應付所得稅及遞延所得稅的總額

當期應付所得稅乃按本年度應課稅溢利計算。應課稅溢利不包括已撥往其它年度的應課稅或應扣減之收入及開支項目,亦不包括可作免稅或不可作稅項扣減之項目,故與收益表所列純利不同。

遞延稅項是按資產負債法,根據財務報表中資產和負債的賬面金額與其用於計算應納稅利潤的相應稅基之間的差額所產生的暫時性差異計算;所有應稅暫時性差異產生的遞延所得稅負債一般均予確認,但可抵稅暫時性差異產生的遞延所得稅資產只能在未來可實現應納稅利潤足以用作抵銷可抵稅暫時性差異的限度內,才能予以確認。

對附屬公司投資的權益產生的應稅暫時性差異會確認為遞延所得稅負債,除非本集團能夠控制這些暫時性差異的轉回,而且暫時性差異在可預見的將來很可能不會轉回。

在每個資產負債表日,本集團會對遞延所得稅資產的賬面金額進行核查。當很可能不再有足夠的應納稅利潤以轉回部份或全部遞延所得稅資產時,遞延所得稅資產會按不能轉回部份予以扣減。

遞延所得稅是以預期於相關資產實現或相關負債清償當期所使用的所得稅率計算。遞延所得稅會在損益表中扣除或記入,除非其與直接在權益中記入或扣除的項目有關,在這種情況下,該遞延所得稅也會作為權益專案處理。

4. SIGNIFICANT ACCOUNTING POLICIES (continued)

Income taxes

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income and expense that are taxable or deductible in other years, and it further excludes income statement items that are never taxable or deductible.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered. Deferred tax assets and liabilities are offset which they related to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

於二零零四年十二月三十一日,由於還沒有和當地稅務機關達成關於把呆賬準備及某些資產減值用作扣稅用途之協議,董事認為沒有足夠理由確定部分或全部之呆賬準備及某些資產減值之金額約人民幣188,211,000元(二零零三年:人民幣193,193,000元)能夠於將來作扣稅用途,因此潛在的遞延稅項資產不予確認。

於二零零四年十二月三十一日及本年度內並無重大未撥備之遞延稅項。

本年度稅務支出	Tax charge and effective tax rate for the year	<u>27,034</u>	<u>16.0</u>	<u>14,090</u>	<u>20.1</u>

At 31st December, 2004, the deductibility of the allowance for doubtful debts and impairment of certain assets for taxation purpose has not been agreed with the local tax bureau. In the opinion of the directors, it is not reasonably certain that the whole or part of the amount of accumulated allowance for doubtful debts and impairment of certain assets of approximately Rmb188,211,000 (2003: Rmb193,193,000) could be deducted in determining taxable profits in the future. Accordingly, the potential deferred tax asset effect has not been recognised in the financial statements.

There was no significant unprovided deferred taxation for the year or at the balance sheet date.
